Who We Are

Why Pets In Need

 The ONLY non-profit veterinary clinic in the Greater Cincinnati and Tri-State region that provides comprehensive, affordable veterinary care.

 Committed to people with income at or below the 200% federal poverty level and those that have limited income like the elderly, veterans, those that are homeless, or have a disability.

 A high quality veterinary practice, serving 4,000+ pets each year and growing.

 Kind, compassionate, and supportive with our families and their pets.

TOO MANY PEOPLE ARE STRUGGLING TO AFFORD PET CARE

More than 90 million households in the U.S. share their homes with a pet, underscoring the vital role pets play in our lives.

Pets provide purpose, comfort, and unconditional love, especially for individuals and families navigating extra challenges in their daily lives.

With more than one in four Cincinnati families and individuals living below the poverty line, veterinary care is financially out of reach.

When veterinary care is not affordable, pet owners face heartbreaking decisions: surrendering their pet, delaying or forgoing necessary care, or in the most desperate of circumstances, abandoning their pet altogether.

We make it possible for vulnerable pets to receive the care they need, so fewer families are faced with these impossible choices.

Keeping pets healthy and together with the people who love them.

"My pets are my family," she says with a smile. "I wouldn't be able to have them without Pets In Need."
-Karen A.
